

July 26, 1982

Memo to File:

RE: Inspection of the South
Lisbon Mine
ACT/037/018
San Juan County, Utah

On July 13, 1982, the above-mentioned mine was inspected by Tom Tetting, Susan Linner and Sandy Pruitt of the Division. The visit was carried out at the request of the company which had finished reclamation work on June 18, 1982.

The work described in the inner company memo dated June 23, 1982 and copied to the Division is as stated except that evidence of reseeding was not readily observable. There were no signs of harrowing or dragging, implanting or any other method which might be expected to accompany a reasonable attempt at revegetation.

(Mrs.) Dianna Evans at the Minerals Recovery Corporation has been notified that the Division will monitor growth success for the following three years prior to making a recommendation on bond release. A letter will be sent to her notifying the company that an inspection has been made.

THOMAS N. TETTING
ENGINEERING GEOLOGIST
